Aim and Scope: *Numerical Heat Transfer, Part A: Applications* is an international vehicle for the publication of numerically based, results-oriented papers dealing with problems in heat transfer, mass transfer, and fluid flow. The underlying numerical solutions may be based either on available methodology or on adaptations of moderate extensions of available methods. The presentation of experimental results which support the numerical solutions is also acceptable. However, papers whose main focus is on innovative numerical methodology development should be submitted to a companion journal, *Numerical Heat Transfer, Part B: Fundamentals.*

Abstracted/indexed in: Applied Mechanics Review; CSA Aluminum Industry Abstracts; CSA Computer Information Systems Abstracts; CSA Engineered Materials Abstracts; CSA Environmental Sciences & Pollution Management Database; CSA Metals Abstracts/METADEX; Chemical Abstracts; CSA Corrosion Abstracts; Current Contents/Engineering, Computing, and Technology; Engineering Information Inc.; Information Service in Mechanical Engineering (ISMEC); Materials Science Citation Index™; Nova Information Services Co.; Research Alert; Science Citation Index; and SciSearch.

Numerical Heat Transfer, Part A: Applications (USPS permit number 670-430) is published in two volumes per year, each containing eight issues, for a total of sixteen issues in by Taylor & Francis Inc., 325 Chestnut Street, Philadelphia, PA 19106.
